

ENERGYLINE

DESIGN GUIDE | CUSTOM FINISHES

DESIGN INTENTION

Being designed and manufactured in New Zealand, Energyline can be custom made to suit project requirements and design specifications. An effective way to integrate Energyline systems with your brand is through use of colour palettes or textures and alternate finishes.

POWDER COAT COLOURS

- NON-STANDARD** Non-standard powder coat colour options available through the [Dulux](#) and [Interpon](#) ranges, subject to availability. Other options available, so just get in touch with us about your requirements.
- CUSTOM COLOUR** If what you are looking for is not available, we can work with you to formulate a custom colour to match your specifications.

TIMBERLINE

- TIMBER DETAIL** As standard we like to use 12mm Meranti Ply with a clear over stain. Where luminaire sections longer than timber length, a negative detail in the timber where powder coated aluminium is exposed (10-12mm) is recommended
- SPECIES & FINISHES** Plywood is our preferred timber substrate, as it is dimensionally stable, but solid timber panels can be specified by consultation. Wide variety of suitable timber finishes available as well
- LENGTHS** Custom lengths available for consultation, standard timber individual lengths approx 2400mm
- FASTENINGS** Due to weight of timber cladding, Energyline recommends fastenings *(seen Image 3)*
- CUSTOM DETAILING** CNC routed or laser etched artwork is possible. You dream it up and we'll work with you to make it happen

ALTERNATIVE FINISHES

- VINYL WRAPS** Choose from 3M's [DI-NOC](#) range, subject to availability.
- CUSTOM TREATMENTS** Contact us to discuss your ideas and we'll let you know what's possible

FACTORY NOTES

Timberline – Timber options are limitless although will require compliance checks during development. This may include recycled timber from heritage buildings or the preferred timber for design purposes. Surface mount via direct fixing (direct only profiles). Suspended via rods.

Customisations – Upgrades or accessories to Energyline system by consultation

Image 1: Custom colour project example. Where rod suspended, Energyline colour matches the suspension components to the Energyline luminaires

Image 2: Integrate custom powdercoat colours to match your office colour scheme and/or brand.

Image 3: Example of extended timber and fastening detail
